WAR TO THOSE WHO HOLD OUR KIN IN CHAINS

Thousands dead, thousands more disappeared. The entire history of the border is drawn in blood, from it's first dawn when it was born in steel and gun powder to today as power spreads a sickening nationalism enforced by raids, teargas and bullets.

This machine is no aberration of Trump, it's been a bi-partisan death machine for decades now, funded and armed by Republican and Democrat alike who will never question the sanctity of their god The Border and the blood it continually demands to make flesh that imaginary idea called "America".

Even now, as ICE terrorized the nation from LA to Seattle to Minneapolis, Democrats in true political fashion speak out of one side of their mouths against the supposed excess of the monster they created while they continue to sic their police and national guard on those who would stand up to their terror, even now they voted with Republicans to fund ICE.

It's clear - no one is coming to save us except for us and while all around the country we are beaten, kidnapped, gassed and killed those in power extol to us the virtues of peace and civility as their boots bear down upon our necks.

Let's refuse to play their game any longer.

LET'S BE THE FIRE THAT WILL MELT ICE
